

Shifting to the Common Core

Help students, teachers, and districts meet the new standards and succeed on assessments!

- ▶ Teachers in 43 states need to meet the Common Core State Standards.
- ▶ New assessments measure the full range of learning required by the standards.
- ▶ *Shifting to the Common Core* is a customizable classroom resource to help teachers meet the standards and prepare students for the new assessments.

How are these standards and assessments different?

- ▶ Previous standards and assessments required students to demonstrate the first levels of knowledge: recalling, understanding, and applying.
- ▶ The new standards and assessments require these levels but also deeper knowledge: analyzing, evaluating, and creating.

Shifting to the Common Core

- Classroom strategies and activities for teaching students to analyze, evaluate, and synthesize in English/Language Arts and Math
- Instructions, rubrics, model answers, and other diagnostic resources
- Recommended remediation program for continued development of deep-thinking skills
- Flexible, adaptable, and customizable content
